

Questions/Comments – Bethel Island

No problem with Delta; We want Southern California to leave us alone. Objective not to sell all of our water. Leave us alone.

Does Conservancy endorse the peripheral canal?

Why are gates still allowed in the Delta (1892 decision navigable water)

What about the pellets (E. densa)?

Where do we find information about geographic/natural history of the Delta (ref. Datra book)?

What does Conservancy do, regarding future development?

Where does the Conservancy fit?

2006-7 time frame – What has changed to put Bethel Island in the primary zone; it wasn't originally in the primary zone.

Climate change is a joke.

How do we stop Southern California from stealing our water and killing our fish?

Conservancy as mop-up crew. Nothing Conservancy can do to help [Delta residents].

Still will take water.

State only interested in tunnel, not interested in real help.

Decision is already made.

Bethel Island – wildlife agreement posted in post office.

If such bad water quality in Delta meadows, why still take water out? Keep it simple, see if more water addresses the issue.

Delta water table is being lowered. Southern California isn't going to take our water.

DWR has authority/power to build canal no matter what.

This (meeting) is hokey-pokey BS.

Will Conservancy be involved in Corps policy of removing vegetation on levees?

What about the dumping in the Delta houseboats?
